Release Notes
IBM DOC 4.0.0-FP1

Jan 31, 2020

Improvements

- [DBPF-553] - Improve excel import/export
- [DBPF-562] - [DBPF-566] - [DBPF-570] - Documentation
- [DBPF-565] - [DBPF-589] - Improve tasks API
-
- [DBPF-577] - [DBPF-626] - Improve data API
- [DBPF-667] - Improve DBRF import/export
- [DBPF-671] - [DBPF-775] - [DBPF-776] - [DBPF-777] - Improve web client style
- [DBPF-688] - Improve scenario API

Tasks

- [DBPF-493] - [DBPF-692] - Improve data server security
- [DBPF-502] - Provide partial import/export support for tasks
- [DBPF-559] - [DBPF-560] - [DBPF-561] - Documentation
- [DBPF-568] - [DBPF-645] - [DBPF-661] - Improve charts API

Bug Fixes

- [DBPF-558] - Fix NPE while asking a missing context
- [DBPF-567] - Documentation Installation - Missing Docker Login information
- [DBPF-571] - Modal Input - Input disappears when value is empty
- [DBPF-572] - Custom DataSource Paginated Queries - Returned type shown as a type in Data API
- [DBPF-575] - Issue in Data Explorer configuration with a long column name
- [DBPF-580] - Task Wizard - Can not run a task
- [DBPF-596] - Data Explorer - Minimal Grid Size unset
- [DBPF-597] - Data Explorer - Loosing selection on scenario changed
- [DBPF-598] - Custom Widget Documentation - Missing Image resource
- [DBPF-607] - Keycloak on OKD no longer working
- [DBPF-609] - Exception While creating 1st view or dashboard
- [DBPF-612] - Duplicate / Export XLS / Export DBRF Scenario Tasks Fail
- [DBPF-614] - Migration to FP01 - Documentation on changes
- [DBPF-615] - Regression on data explorer widget : If the list of tables/folder is too long, it does not fit in the size of the widget
- [DBPF-634] - Keycloak image fails to run .sh script
- [DBPF-635] - Deployment Migration - Documentation
- [DBPF-637] - Chart Configurator - Chart has undefined Data Type
- [DBPF-647] - Exception are not printed in the logs
- [DBPF-668] - Field value not updated when changing type on KPI widget configuration
- [DBPF-689] - Application Configuration Not refreshed
- [DBPF-697] - Wrong table colors on scaffolded apps
- [DBPF-699] - Settings not saved in an empty Web UI, "Application Node not found"
- [DBPF-700] - Error reading Json in "Timeline" widget
- [DBPF-703] - Collector is not registered when backend starts
- [DBPF-704] - After deleting a dashboard, it is still visible/accessible in the left navigation menu
- [DBPF-706] - Data explorer entities names lose the space (if there's any) when the configuration is changed
- [DBPF-707] - Gene chart missing aggregation possibilities
- [DBPF-708] - z-index issue on custom dashboard widgets
- [DBPF-709] - Worker name with Upper case Letter in name will lead to error
- [DBPF-710] - In Data Explorer, fields that are editable by default, are only editable if configuration changed and saved
- [DBPF-711] - Chart Filter - Empty List Value
- [DBPF-719] - Application node created with permissions only for Admin & Admin groups
- [DBPF-721] - Exception while saving Views Order

- [DBPF-751] - Issue with custom widget not implementing getDefaultConfiguration() / Configuration
- [DBPF-755] - WebSocket on OKD not working
- [DBPF-758] - Fields of type Date are not editable in Data explorer
- [DBPF-764] - Backend(maybe dbos as well) tasks status update toaster notifications are not synchronized with actual status
- [DBPF-662] - View & Dashboard Wizard not filtering widget list according to compatibility
